Kraków - a Partner for Global Companies. AbbVie Opens New Office

2026-05-20

Global biopharmaceutical company AbbVie has opened a new office in Kraków. The facility will serve as a shared services centre for finance and human resources. The investment marks the next stage of the company's development in Poland, particularly in the capital of the Małopolska Region, where AbbVie has already been present for over ten years.

Kraków was selected by AbbVie as the location for further investment due to its access to highly qualified professionals, strong academic background, and a well-developed ecosystem of modern business services. As a result, the city has become an important point on AbbVie's global map of operations. The decision to launch the new office space reflects the dynamic growth of AbbVie's Kraków team and the increasing role of the local centre within the organisation's global structures.

"The office you are opening today is a sign of trust in Kraków not only as a labour market, but also as a place to live. By investing here and building a long-term presence, companies contribute to the development of a healthier and more sustainable city – for residents, employers and future generations," said the Mayor of Kraków, Aleksander Miszański.

For the city, the investment further strengthens its position as one of the leading hubs for modern business services in Central Europe. It also aligns with the development of the local economy based on knowledge, innovation and international cooperation.

The opening of AbbVie's new office confirms that Kraków remains an attractive destination for global investors, offering a stable business environment, access to talent and opportunities for long-term growth.
